## BRF-XG / DR / DM

# Photometric stereo lighting

Bar, ring and dome configurations provide directional zones for photometric stereo. Combine lighting, camera and reconstruction software to evaluate surface relief, embossed characters and local defects. Select dimensions for the sample.

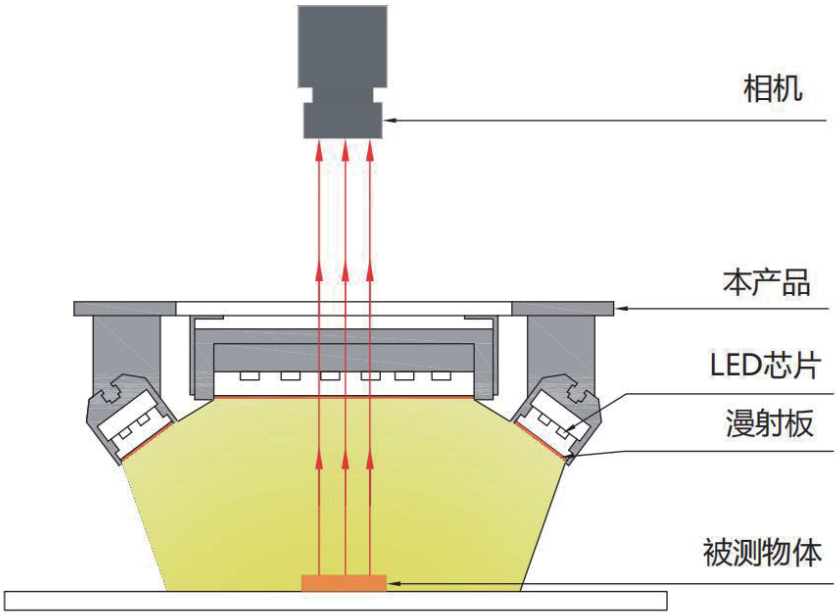

## Technical specifications

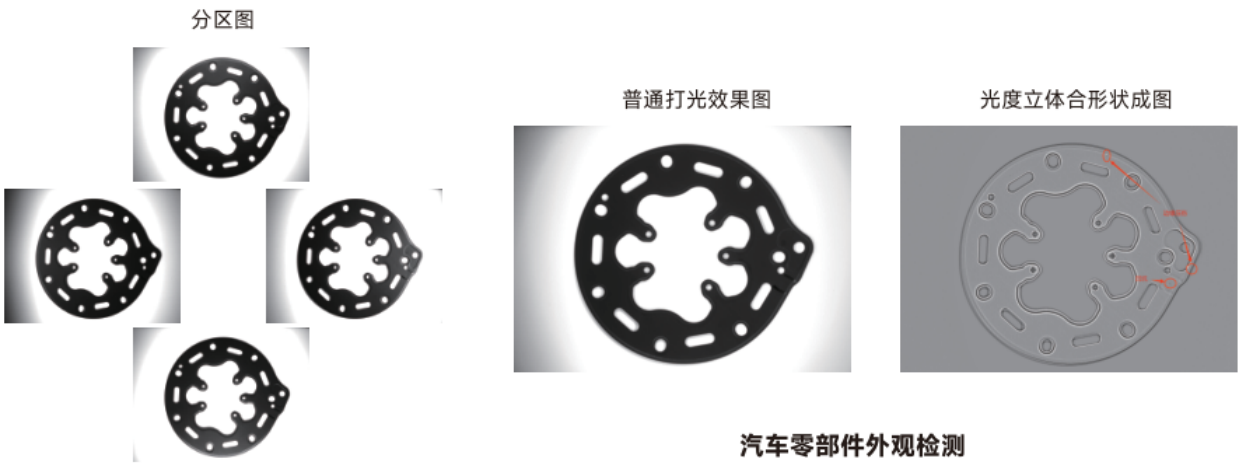

| Parameter | Value |
| --- | --- |
| Directional lighting zones | 4 |

## BRF-XG / DR / DM / Application & construction

### Illumination geometry

### Application imaging examples

Illustrations retain their original technical annotations. Imaging examples are for application evaluation; the final result depends on the workpiece, optics, exposure and lighting configuration.
